This easy guide will help you set up your iPhone or iPad to receive and send email using your proper account settings.

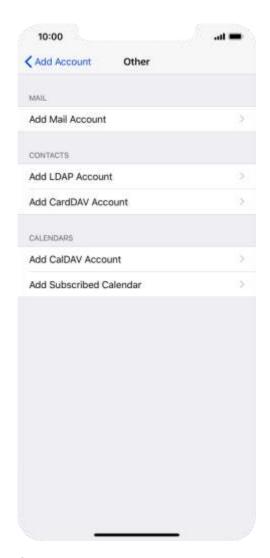

Step 1. Locate your email settings:

- On your iPhone or iPad, open **Settings** (typically on your homescreen)
- Tap Passwords & Accounts

Step 2. In the **Accounts & Passwords** section:

- Tap Add Account
- Tap **Other**
- Tap Add Mail Account

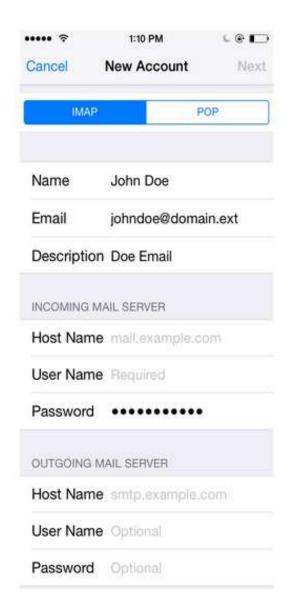

Step 3. Enter

- Your name
- Full email address (ex: myemail@spruceknob.net)
- Password
- Account description

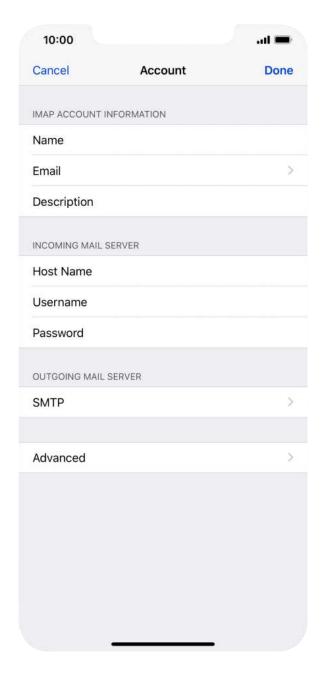

Step 4. Enter Mail Server Information

- Update your **INCOMING MAIL SERVER** settings:
 - o Edit the **Host Name** field to: mail.spruceknob.net
 - o Ensure the **User Name** is your *full* email address
 - IMPORTANT: Ensure that the Email username is your full email address (ex: myemail@spruceknob.net) and that your Password is correct
- Update your OUTGOING MAIL SERVER settings:
 - o In the **Host Name** field enter: **smtp.spruceknob.net**
 - o In the **User Name** field enter: Your *full* email address
 - o In the **Password** field enter: Your email password
 - Tap Next
 - o Tap Save

Step 5. Finalizing Server Settings

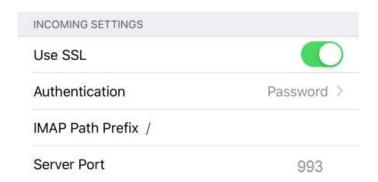

- Tap the name of the email account you just set up
- Tap **Account**
- Tap **SMTP**

- Tap the field below **PRIMARY SERVER**, Ensure:
 - o **Use SSL** is turned on
 - o **Authentication** is set to Password
 - o **Server Port** is set to 465

- Tap **Done**
- Go back a page and tap **Advanced**, Ensure:
 - o **Use SSL** is turned on
 - o **Authentication** is set to Password
 - o **Server Port** is set to 993

• Go back a page and tap **Done**

Congratulations, your email is now configured!
